Computer Science

GPA : 3.72

April 2019 - August 2021

Science

October 2022 - Present

Bachelor of Science

Projects

AI Chatbot

Developed a basic AI chatbot to respond to user inputs using decision-making logic in Python.

Focused on implementing decision trees and basic natural language processing techniques.

Gained foundational knowledge in AI programming and problem-solving.

URL Shortener

Built a responsive URL Shortener app with React and Tailwind, allowing users to generate short links instantly through API integration.

Implemented API handling and state management for real-time link creation, validation, and display.

Applied version control with Git and deployed the project to showcase a production-ready frontend application.
